## IATA Chooses TopLeaf

*Delta, BC - 24 October 2005*

The International Air Transport Association, IATA (Montreal, Canada), has selected TopLeaf 7 XML Composition Software for production of its XML documentation.

IATA based its purchase decision on extensive functional testing of TopLeaf. Initially, TopLeaf will be used initially to produce two manuals.

Critical in the decision to choose TopLeaf was product support. Metaformix provided test samples, data analysis and product information in the pre-purchase phase of IATA's evaluation.

IATA (<http://www.iata.org>) is a global trade association representing and serving 265 airline members. The association promotes safe, secure, and efficient international air transport within a framework of clearly defined industry standards.
